## **APPENDIX D**

### **RÉSUMÉS**

---

#### **Andy Rodgers, CHMM, CPESC, REA**

Andrew S. Rodgers has over 27 years of experience providing comprehensive technical and management consulting services to public and private entities throughout the western United States. Mr. Rodgers specializes in developing cost effective materials assessment and management programs (soil, groundwater, stormwater) to support design and construction, utility and public works operations, and redevelopment projects. Mr. Rodgers graduated from New England College, Henniker, NH, with a B.A. in Geology and Environmental Studies, and has since worked on numerous Phase I and Phase II assessments and remediation projects associated with property acquisition and redevelopment.

#### **Peter A. Dellavalle, PG**

Peter A. Dellavalle graduated from California State University, Fresno, with a B.S. in Geology. Within his 23 years of experience with environmental studies, he has conducted numerous Phase I and II Environmental Site Assessments involving aerial photograph interpretation, review of regulatory agency files, subsurface exploration, development of site investigation workplans, monitoring well design and installation, and soil and groundwater baseline studies of residential, commercial, and industrial sites.
